## Performance Welding Wire

We are a welding solutions company who provides cutting-edge welding technologies to our customers' welding demands.

For four decades, Hyundai Welding has been supporting Korea's most successful industries through partnerships in the Automotive, Shipbuilding, Offshore, EPC, Power Generation, and Construction sectors of the South Korean economy. Hyundai Welding has helped Hyundai Motors and Kia Motors to increase their productivity and to lower costs by providing optimal welding solutions - supporting their recent global successes as their premier welding partner. Hyundai Welding Products USA offers the original Ball Pac system and know-how to support US manufacturing.

Furthermore, Hyundai Welding is working very closely with the world's No. 1 shipbuilding and heavy industry companies, such as, Hyundai Heavy Industries, Samsung Heavy Industries, DSME, Doosan Heavy Industries etc. to develop the most competitive welding solutions for all of their customers' welding needs. As a result, Hyundai's flux cored wire is recognized as one of the world's best quality wires and we are proud that our products have helped our customers to become some of the world's top rated companies in a variety of industry sectors.

Recently, Hyundai Welding has successfully developed a variety of welding solutions for the Energy sector, which demand high quality and assurance of performance.

For Offshore Plants, LNG/LPG Storage Tanks, Intercontinental Gas Pipeline Installation and Power Plants, including Nuclear and Wind Power, Hyundai Welding offers specially designed welding consumables and equipment which includes high Nickel Alloy, Stainless Steel, Duplex, and Heat-Resistant Steel products.

These high quality consumables are designed for low hydrogen levels, strict residual management, guaranteed impact value under extreme weather conditions and manufactured with special production programs to supply the best performance with consistency to our customers.

Hyundai Welding Products is also providing their experience and know-how to the Shipbuilding, Offshore Plants, Oil & Gas, and Energy sectors around the world, to keep them up-to-date with the latest welding solutions.
